PREFACE

This edition of the *Catalogue of Publications and Products* lists titled products released by the Australian Bureau of Statistics (ABS) between 1 January 1995 and 31 December 1998, and those expected to be released during 1999. The Catalogue is also available on CD-ROM, and can be accessed through the ABS Website (www.abs.gov.au).

The Catalogue is the primary reference to statistical information published from ABS collections. It provides reference information such as product title and reference year, and also provides a brief description of the content of each product. The release medium of the product — printed publication, floppy disk, CD-ROM or on-line service — is also indicated.

Most ABS data are available in computer readable form and access to over 90,000 time series is available through the *PC AUSSTATS* service (see page viii for details).

The ABS also offers a number of consultancy services, ranging from answers to simple statistical inquiries to the provision of detailed statistical analysis and survey design (see page 1 for details).

Suggestions for improvements to the Catalogue, or queries on matters not itemised in detail — such as the availability of data on special interest topics and unpublished statistics — should be directed to Information Inquiries in any ABS office. The addresses and telephone numbers of ABS offices are shown on the inside back cover.

HOW TO ACCESS ABS INFORMATION

Become an ABS Subscriber

Clients who would like to receive information from the Australian Bureau of Statistics (ABS) on a regular basis, or who need to amend their existing subscription details, should contact the ABS Subscription Service on 1300 366 323. (Note that calls are charged at local call rates, apart from calls from mobile phones which are charged at the applicable mobile rates.)

From an ABS Bookshop

ABS bookshops in each capital city carry a wide range of ABS products. The address, telephone and facsimile numbers for bookshops in all ABS offices can be found on the inside back cover of this Catalogue.

Use our Mail Order Service

ABS products can be mailed directly to you. Many are available to be emailed to you directly. Orders may be placed by either telephone, email, or facsimile. For details please refer to the back cover of this Catalogue.

Visit a Library Near You

ABS publications are available for reference at many public and tertiary libraries, the National Library and State libraries. More information is available on the ABS Internet site (the address for which is included at the foot of this page). Public access to ABS libraries in each capital city is available on a self-help basis.

CPI Infoline — 1902 981 074

This recorded message service provides current and historical Consumer Price Index data.

Dial-a-Statistic — 1900 986 400

This recorded message service provides the latest statistics for the Consumer Price Index, National Accounts, Balance of Payments, Labour Force, Average Weekly Earnings and other topics. (Call cost is 75c per minute. Calls from mobile phones are charged at the applicable mobile rates.)

On-line Access via *PC AUSSTATS*

Subscribe to *PC AUSSTATS* (1401.0) and have 24 hour on-line access to the latest time series information from the ABS. Over 90,000 series are available, often with 15 years or more historical data.

Discuss Your Information Requirements

Contact ABS consultants through our telephone inquiry service, by facsimile or via email. For more detailed information about the services ABS consultants can provide, please refer to Part 1 of this Catalogue. The inside back cover of this Catalogue includes ABS facsimile and email contact details.

INTRODUCTION

The Australian Bureau of Statistics (ABS) is Australia's official statistical organisation. Its main function is to provide government and the community with an efficient, user-oriented national statistical service.

THE CATALOGUE OF PUBLICATIONS AND PRODUCTS

The *Catalogue of Publications and Products 1999* refers to titled products which the ABS has issued since 1 January 1995 or expects to release during 1999. In some cases, for example where products are part of a current series, information on earlier issues has been included.

The Catalogue is divided into four parts.

Part 1 — CONSULTANCY SERVICES

This introduces the many various consultancy services provided by the ABS, such as: flexible data delivery; thematic maps; survey and sample design; data analysis; data management; methodological reviews; tender evaluation; and statistical training.

Part 2 — NATIONAL PRODUCTS

This part comprises a list of products that provide information referring to the whole of Australia. Many national products contain separate statistics for States and Territories as components of Australian totals, and can be used for comparing State and Territory figures. Products are arranged in sequence by ABS catalogue number. (See page xiv for an explanation of ABS catalogue numbers.)

Part 3 — STATE AND TERRITORY PRODUCTS

This is a list of products that provides information about a particular State or Territory. These products contain more detailed information than is provided in similar national publications, and in some cases they provide a finer geographic breakdown. Products are arranged in sequence by ABS catalogue number after being separated into State and Territory as indicated by the fifth digit of the number. (See page xiv for an explanation of ABS catalogue numbers.)

Part 4 — INDEXES

As there are in the order of 950 publications and products introduced in this Catalogue, a number of different indexes are included to assist in locating the data required. The indexes are:

Directories, catalogues and guides

A comprehensive listing of directories, catalogues and guides issued by the ABS on particular topics can be found on page 285.

Information and technical papers

This index contains a listing of information and technical papers produced by the ABS on the availability, collection and format of statistics. They are listed on pages 286–287.

Occasional and professional papers

Occasional papers are prepared by individual ABS officers and provide accounts of ABS development or research work, and analyses of an experimental nature. These papers are listed on page 288.

Releases by medium

Many releases are available from the ABS either on floppy disk or CD-ROM. Indexes to these formats can be found on pages 289–293.

Feature articles

A list of feature articles which have been published in ABS publications since 1 January 1995 is included on pages 294–300. Feature articles appear in some publications frequently and in others only occasionally. They examine statistical issues of particular interest or complexity.

Census products

For convenience, all 1996 Census of Population and Housing products are listed together in catalogue number order. The list appears on pages 301–304.

Titles

This index comprises a complete list of publication and product titles in alphabetic order. It appears on pages 305–329.

Subject index

This index, which appears on pages 330–407, lists ABS publications and products that are available pertaining to a specific subject of interest. It has not, however, been possible to include exhaustive lists of subjects for the Australian and State year books and pocket year books. While the most significant references for all year book publications are given in this index, each publication contains a more detailed index of its own.

‘DISCONTINUED’ PRODUCTS

There may still be stocks available of products which are labelled ‘discontinued’ in the margin of this catalogue. For details, please contact the ABS inquiries number in your State or Territory, or email: client.services@abs.gov.au

YEAR 2000 COMPLIANCE AND ABS

The ABS recognises the considerable importance of ensuring the Year 2000 compliance of all its products, in order to ensure that there are no adverse impacts to any of its clients resulting from the Year 2000 date change.

The ABS, as part of the Commonwealth of Australia, has made a large commitment of effort and resources to address Year 2000 compliance issues. We have a coordinated program of identifying systems at risk from Year 2000 problems, and of fixing or redeveloping such systems. We have a Year 2000 Testing Laboratory where systems with artificially aged data can be tested on equipment initialised with dates set in and beyond the Year 2000.

The ABS uses the definition of Year 2000 compliance promulgated by Standards Australia. This compliance definition is explained further below. Please note that testing is performed against a large number of date conditions.

Many ABS products contain executable code, such as installation or spreadsheet software, to assist clients in using the data product. The ABS is taking considerable steps to ensure that there will be no Year 2000 problems encountered by any clients using these (or any other) ABS products.

However, the ABS does not warrant that all materials used in the creation of ABS data and products are Year 2000 compliant. The ABS has not provided all the material used to create ABS data and products and it is not possible to give any warranties for any third-party material. The ABS advises against using ABS data and products with any other products which are not Year 2000 compliant. The party responsible for the supply of the other products should be contacted for further information in relation to the uses which can be made of those other products.

The Year 2000 Compliance Definition

There are various guidelines as to what constitutes 'compliance'. The ABS has adopted the Standards Australia definition, as follows (SAA/SNZ MP77: 1998):

Year 2000 conformity shall mean that neither performance nor functionality is affected by dates prior to, during and after the Year 2000.

In particular —

- (a) Rule 1: No value for current date will cause any interruption in operation.
- (b) Rule 2: Date-based functionality must behave consistently for dates prior to, during and after Year 2000.
- (c) Rule 3: In all interfaces and data storage, the century in any date must be specified either explicitly or by unambiguous algorithms or inferencing rules.
- (d) Rule 4: Year 2000 must be recognised as a leap year in terms of handling both 29th February and day 366.

Where to Find Up-to-date Information About Year 2000 Compliance of ABS Products

Detailed information covering those products about which the ABS has received most queries relating to Year 2000 compliance is being progressively posted onto the ABS Website (www.abs.gov.au). Alternatively, or for information about the compliance status of other products, you may wish to contact:

The ABS does not propose to test superseded and discontinued products. Any known problems with such products will be posted onto the ABS Website.

This statement is provided for information purposes only and is subject to change. Its contents are based on the current status of the ABS Year 2000 Project and the information which is currently possessed by the ABS on the Year 2000 compliance status of third-party components on which ABS products and services rely. As the ABS Year 2000 Project proceeds, or further information is made available to the ABS, it may be necessary to amend details contained in this statement. Whilst every care has been taken in developing this statement, the ABS accepts no liability for any loss or damage caused, arising directly or indirectly, in connection with reliance on its contents.

PRICES

The balancing of public good obligations and user pays underpins the ABS pricing policy. Prices quoted in this Catalogue are for individual copies and are subject to revision. Annual subscription rates include postage and packaging charges.

INFORMATION ON ABS RELEASES

To supplement this Catalogue, the ABS produces a monthly publication *Publications Issued in [name of month]* (1102.0), and a twice-weekly *Release Advice* (1105.0).

The *Release Advice* is issued on Tuesdays and Fridays and gives titles of all ABS publications expected to be released in the next few days. The last issue of the *Release Advice* each month also contains a list of main economic indicator publications expected to be released during the following month.

Information on expected releases is also available through the ABS on-line service, *PC AUSSTATS* (1401.0). *Release Advices* are also posted daily on the ABS Website (www.abs.gov.au).

ANNUAL REPORTS

The *Australian Bureau of Statistics Annual Report* (latest issue 1997–98) reports on the operations of the ABS.

The *Australian Statistics Advisory Council Annual Report* (latest issue 1997–98) outlines the functions and activities of the Council.

The *Australian Bureau of Statistics Forward Work Program* (latest issue 1999–2000 to 2001–2002), which will be produced annually, describes for each ABS program the objectives, outputs, main medium term developments and resources used. To obtain a copy please telephone Canberra 02 6252 5766.

STATISTICS RELATING TO EEO GROUPS

References to publications relating to groups specifically designated by the Commonwealth Government's Equal Employment Opportunity initiatives can be found in the Subject Index beginning on page 330 under the following headings:

- Aboriginal and Torres Strait Islander people
- people from a non-English-speaking background
- people with disabilities
- women

THE ABS CATALOGUE NUMBERING SYSTEM

The system consists of either a five-digit or ten-digit code.

Five-digit Code

Printed publications usually have a five-digit code.

- The *first digit* defines a broad subject group as follows:
 - 1 General
 - 2 Census of Population and Housing
 - 3 Demography
 - 4 Social Statistics
 - 5 National Accounts, International Trade and Finance
 - 6 Labour Statistics and Prices
 - 7 Agriculture
 - 8 Secondary Industry and Distribution
 - 9 Transport, Tourism
- The *second digit* specifies a subgroup of the broad subject group. Refer to the Contents on page iii for details of the subgroups.
- The *third and fourth digits* are serial numbers which are permanently allocated to publications within categories formed by the first two digits. An allotted number will remain unchanged provided the contents of a publication remain essentially the same.
- The *fifth digit*, after the full stop, represents the State or Territory covered by the statistics. The codes for each State and Territory are:
 - 0 Australia
 - 1 New South Wales
 - 2 Victoria
 - 3 Queensland
 - 4 South Australia
 - 5 Western Australia
 - 6 Tasmania
 - 7 Northern Territory
 - 8 Australian Capital Territory
 - 9 External Territories

Products containing Australia-wide information (fifth digit: 0) are listed in Part 2 — National Products, pages 9–175. Products containing information pertaining to a specific State or Territory (fifth digit: 1–9) are listed in Part 3 — State and Territory Products, pages 177–282.

Example: ABS catalogue no. 3311.2

1st digit:	3	=	Demography
2nd digit:	3	=	Vital statistics
3rd & 4th digits:	11	=	Serial numbers
5th digit:	2	=	Victoria

Title of publication = Demography, Victoria.

This product is listed in Part 3 — State and Territory Products, page 201.

Ten-digit Code

Products released in a medium other than a printed format have a ten-digit code with the sixth and seventh digits together indicating the medium of release. For lists of ABS products released on either CD-ROM or floppy disk, refer to pages 289–293.

NOTE: Publications and products may have multiple listings when they have significant reference to more than one subgroup. For example *Directory of Census Statistics* (2910.0) is listed in subgroup 11: Catalogue and Guides (page 14) and subgroup 29: Census Reference Products and Services (page 44).

When a publication or product listed in the State and Territory Products chapter refers to more than one State or Territory, a full listing can be found in both sections. For example, *Labour Force, New South Wales and Australian Capital Territory* (6201.1) is listed under both Australian Capital Territory (page 277) and New South Wales (page 188).

1. CONSULTANCY SERVICES

Part 1 describes the various consultancy services provided by the Australian Bureau of Statistics.

CONSULTANCY SERVICES

The Australian Bureau of Statistics (ABS) will make a valuable addition to your research team.

When you need to engage professional, timely and objective statistical consultancy services first consider the range of services available from the ABS. The ABS houses Australia's largest and most comprehensive range of statistical data and has a wide range of specialist experts on hand to help you with your information and statistical needs.

This expertise can be found in the form of:

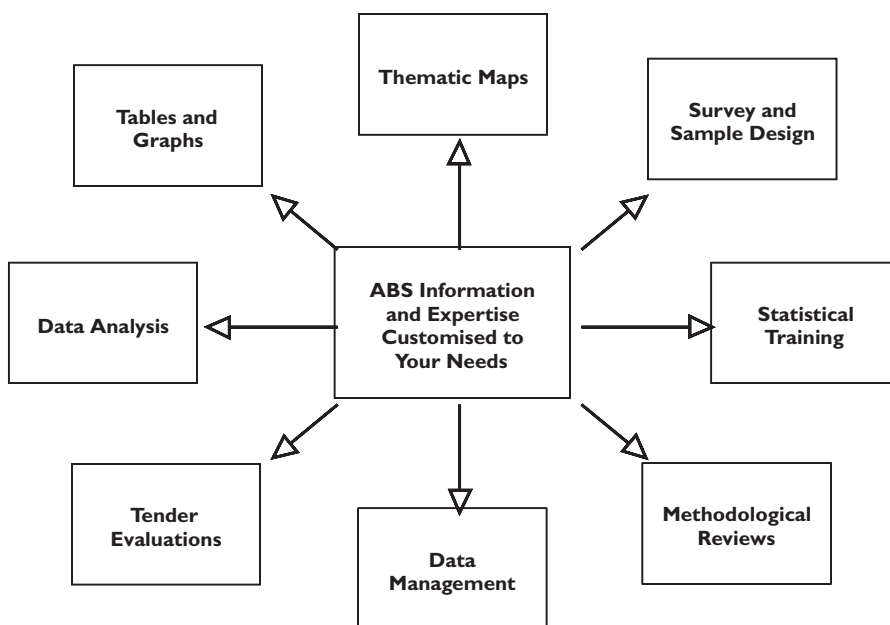

- demographers
- mathematical statisticians
- national and international accountants
- geographers
- professional librarians
- survey designers
- time series and seasonal adjustment analysts
- experts in all ABS social and economic statistics

Our consultants will assist you by accessing the full range of ABS information including published and unpublished statistics on industry and business, agriculture, international trade, finance, population census, health, welfare, and much more.

In addition, our consultants can analyse data for you as well as model or massage it to help meet your information needs. And, if the data does not exist we can provide methodological advice on how you can obtain it.

We can tailor our service to your needs, time frame and budget, to provide you with a range of solutions.

Range of Solutions Available as ABS Consultancy Services

Tables and Graphs

Most data from the ABS are delivered in tabular format, either in hard copy or electronically. Standard publications and products have fixed formats. However, customised consultancies can most often be delivered in whatever tabular or graphical format is required.

As not all ABS data are published in our standard publications, customised tables and graphs can be produced to provide access to a wider range of information than is covered in the publications.

Tables of data show the precise estimate for each statistic while graphs are useful to see trends over time or the difference in magnitude between variables. The ABS also has the flexibility to download most datasets as flat files so you can import them into your own database or spreadsheet packages and create your own tables and graphs as needed.

Thematic Maps

Often it is difficult to identify geographical patterns when data are presented in tables. Mapping data allows for an immediate visual impact or interpretation of the data. For example, you may wish to 'see' areas with high concentrations of young people, or manufacturing businesses, or population density.

The advantage of visual impact means mapping lends itself to presentational or promotional purposes, as well as analytical purposes.

ABS data can also be mapped with data from your own organisation. This will help you draw connections between general population or business characteristics and the characteristics of your own organisation. Alternatively, you may wish to show locations of facilities or outlets on a map of ABS data.

If you have a geographic focus, then it is wise to consider the benefits of mapping ABS data using our consultancy services.

Survey and Sample Design

ABS Statistical Consultants have extensive survey and sample design experience. They can provide advice on conducting a survey, and can help you undertake components of your survey.

The following details the services we can provide:

Project definition

- assisting in defining your survey's objectives and methodological requirements.

Survey design

- defining your population to be surveyed;
- deciding which list of the population should be used;
- identifying how much sample; and how to select your sample;
- considering what is the level of accuracy and confidence required about your results;
- advising on how to extrapolate from the sample survey to the population;
- presenting your results in a report; and
- determining the survey cost; the components; and the timetable.

Questionnaire design

- questions to include and how to ask them;
- the best structure of the questions and how should they be presented; and
- questionnaire testing.

Data collection

- is data collection required? Are there data sources already available that can be used?
- how to collect the information: telephone, interview or mail?

Data processing

- ensuring you have good quality data by editing and validating.

Analysing the results

- preparing tabulations, cross-tabulations and graphical presentations; and
- undertaking a range of more complex analytical techniques such as regression modelling.

Statistical Training

If you are designing a survey, concerned about data quality or have only basic data analysis techniques, then the ABS Statistical Consultancy Service can provide you with the tools and skills to help.

Our expert and experienced consultants provide a range of training in designing questionnaires, samples, surveys, analysing data, and managing the survey process. Our courses provide you with the knowledge as well as practical skills in these techniques.

Courses are offered in most States and Territories, and can be tailored to your specific needs. Our current course content includes:

- Basic Survey Design
- Principles of Questionnaire Design
- Focus Group Techniques
- Basic Statistical Analysis
- Introduction to Sampling Techniques
- Turning Data into Information

Course participants receive a range of supporting notes and material and we also offer hands-on computer-based training for teaching the numerous analysis techniques.

A number of major organisations have benefited from engaging our training services, including the Commonwealth Government, State, Territory and local governments, libraries, government-funded and non-profit organisations.

Methodological Reviews

Our statistical consultants can undertake reviews of methodologies and prepare reports which examine:

- the feasibility of a range of methodological options for conducting a survey;
- your methodological proposal for conducting a survey, or analysing data; and
- your analysis of data and its accuracy.

Data Management

ABS Statistical Consultants can assist with the organisation of data into a statistical framework by advising on standards, suitable arrangements, objectives, and input and output requirements.

Tender Evaluations

ABS Statistical Consultants have extensive experience in the role of expert statistical consultants. They can assist in evaluating the statistical and analytical content of your tenders, or in the preparation of these components of your tenders. In this situation, ABS cannot be a party submitting a tender.

Data Analysis

ABS Statistical Consultants are qualified statisticians with experience in simple analysis techniques to produce means and measures of spread, as well as more complex analytical techniques including:

- describing the relationships between a number of variables — regression analysis, we can develop the optimal regression model or we can apply your model to our data;
- summarising a large amount of data — factor analysis is a technique which summarises such a large amount of related information into a few useful factors;
- grouping sub-populations — cluster analysis can be used in this situation to provide groupings of sub-populations that behave similarly with respect to a number of variables;
- testing the differences between a number of populations — analysis of variance, for example, ABS Consultants can test the difference in average annual kilometres travelled between different vehicle types (cars, station wagons, taxis, motor cycles, utilities, panel vans, etc.);
- adjusting historical data to determine trends and forecasts — time series analyses; and
- standardisation — often the comparison of a social indicator over time, or between different areas, is spoilt by the influence of another variable which is moving independently. The effect of this variable can be neutralised by standardisation. For example, eliminating the effect of different age compositions on death rates for several States and Territories is called age standardisation.

Contact the ABS Consultancy Team Today

A limited amount of ABS information that is readily and quickly available can be provided free. However, most consultancies are provided on a fee-for-service basis.

Telephone or fax your local ABS office to talk to a consultant (see contact details on the back of this publication).

OR

Visit the ABS Website (www.abs.gov.au) where you will be able to find a range of ABS information, and lodge a request.

2. NATIONAL PRODUCTS

Part 2 lists national printed publications and other products. Note that many of these contain statistics at the State and Territory level. However, all State and Territory specific publications and products are now shown in Part 3.

11: DIRECTORIES, CATALOGUES AND GUIDES

1101.0 Catalogue of Publications and Products

Annual; first issue: April 1967; latest issue: 1999 is expected to be released in 1999; 452 pp; \$6.00; ISSN: 1032-805X

Previously: Catalogue of Publications, Australia (ISSN: 1032-805X)

Lists publications and other major products and services available from the ABS. National and State products released since 1995 and those expected to be released during 1999 are included. A brief description (abstract) of the contents of each item is given, as well as details of frequency, date of first issue, number of pages, price and ISSN or ISBN. Information is provided on unpublished data and the availability of customised services. A title index, releases by medium index for non-printed products and a subject index are also included.

NOTE: Also available on CD-ROM (1101.0.30.001), through the ABS Website on the Internet (www.abs.gov.au), and on the CD-ROM product *Statistical Concepts Reference Library* (1361.0.30.001).

1102.0 Publications and Products Released in [Month]

Monthly; first issue: October 1961; 12 pp; \$1.10; ISSN: 1328-2786

Previously: Publications Issued in [Month] (ISSN: 1031-0673)

Lists publications and products released by the ABS central and State offices during the reference month.

1105.0 Release Advice

Twice weekly; first issue: November 1969; 2 pp; \$1.00; ISSN: 1324-1117

Previously: Publications Advice (ISSN: 0156-4722)

Lists products released by all ABS offices on the day of issue of the *Release Advice* and those expected to be released on the following four working days.

NOTE: Copies are available by subscription, or free of charge on Tuesdays and Fridays over the counter from ABS bookshops. A daily *Release Advice* is also available from the ABS Website on the Internet (www.abs.gov.au).

11: DIRECTORIES, CATALOGUES AND GUIDES

1115.0 Colonial Microfiche Series — Colonial Statistics

Irregular; first and latest issue: 1804 to 1901; Microfiche; \$11,000.00

Collects over 250,000 pages of information stored on more than 3,000 microfiche. It represents most of the statistics published by the various colonial bureaux and their precursors, and also includes the 1901 Census, the first and only census to be carried out individually by each of the newly federated States.

NOTE: A catalogue of the microfiche, *Catalogue of Australian Statistical Publications 1804 to 1901* (ISBN: 0 642 14904 6), is also available at no extra charge. Individual State sets and titles (1115.1 to 1115.6) can also be purchased.

1118.0 Directory of Housing Related Statistics

Irregular; first issue: 1988; latest issue: 1991; 182 pp; \$30.00; ISBN: 0 642 23257 1

Previously: ISSN 1032-0865

Presents details of housing-related statistics produced by both government and non-government sources. The directory is intended to acquaint users with the wide range of housing-related data currently available. It is also useful as a reference guide which allows users interested in housing-related data to locate quickly and easily the statistical information they need. Data entries are organised by broad subjects. Entries include the name of the organisation, a detailed description of the data collected, the purpose of the collection, the geographic area covered by the collection as well as the frequency and method of collection.

Discont'd

1122.0 Historical Microfiche Series — Statistical Publications Since Federation

Irregular; first issue: 1901–1984; final issue: 1993; Microfiche; Price varies with requirements; ISSN: 1038-6424

Contains publications released by the central office of the ABS between 1901 and 1993 and publications issued by the State offices between 1985 and 1993. The microfiche series is available as a set, or in parts, and discounted rates are available to purchasers of the whole set. The series includes a comprehensive index, guide cards and a timber storage cabinet for purchasers of the complete set.

NOTE: For further information, please contact the Historical Microfiche Manager on Canberra 02 6252 6605.

Discont'd

1123.0 Index to the Historical Microfiche Series — Statistical Publications Since Federation

Irregular; first issue: 1901 to 1990; final issue: 1901 to 1993; 550 pp; \$90.00; ISSN: 1038-6300

Continues: 1121.0

Lists publications released by the central office of the ABS since 1901 and publications issued by the State offices since 1985 and 1993. All publications listed are available on microfiche as part of the Historical Microfiche Series. The index to the Historical Microfiche Series is free to Historical Microfiche customers, but is also available for purchase.

1124.0 Historical Publications on CD-ROM

Annual; first issue: 1994; latest issue: 1998 is expected to be released in 1999; CD-ROM; \$2,500.00; ISSN: 1323-5966

Irregular; first and latest issue: 1997; 700 pp; \$92.00; ISBN: 0 642 23200 8

Replaces: 1222.0 and 1223.0.

Comprises an explanation of the conceptual basis of the classification, the classification structure and definitions for all levels of the classification (major, sub-major, minor and unit groups and occupations). The primary purposes of this publication are to aid in the interpretation of ABS occupation statistics and to provide detailed occupation information. This publication is the ASCO Second Edition equivalent of 1222.0 and 1223.0.

NOTE: Also available on CD-ROM together with a Microsoft Windows™ based computer-assisted coder (1220.0.30.001), and on the CD-ROM product *Statistical Concepts Reference Library, 1997* (1361.0.30.001).

1221.0 Information Paper: ASCO — Australian Standard Classification of Occupations

Irregular; first issue: 1986; latest issue: 1996; 38 pp; \$10.00; ISSN: 1326-5755

Discusses the development of *ASCO Second Edition* (1220.0). Contains information on the conceptual basis and classification criteria used and the purpose and contents of various ASCO publications and electronic products released in 1997. Also contains the classification structure at the most detailed level.

NOTE: See also 1220.0.

1232.0 Information Paper — Census of Population and Housing: Link Between First and Second Editions of Australian Standard Classification of Occupations (ASCO)

Irregular; first and latest issue: 1996; 36 pp; \$10.00; ISBN: 0 642 25741 8

Describes the link between the First and Second Editions of ASCO and provides a set of basic statistical tables for comparative analysis. It also explains the link file, developed by the ABS to facilitate the comparison of occupation data, which shows the quantitative relationship between the two editions. Occupation data from the 1996 Census of Population and Housing were coded to both editions of ASCO.

1233.0 Australian Harmonized Export Commodity Classification (AHECC)

Irregular; first issue: 1988; latest issue: 1996; Loose-leaf; \$30.00; ISBN: 0 642 23209 1

The AHECC is used in the preparation of export documentation and in the compilation of Australian export statistics. The classification is arranged in five sections: introduction and explanatory notes; codes, abbreviations and summary of the AHECC; detailed export commodity classification; key of changes between export statistical items; and alphabetical index to the AHECC. The AHECC is a dynamic classification with any necessary changes being implemented on 1 January and 1 July of each year. Replacement pages will be issued as required.

NOTE: One copy may be issued free to genuine exporters and their agents; updates are supplied free of charge to subscribers on the 1233.0 mailing list. Replacement pages are provided twice yearly (1233.0.00.001).

1234.0 Australian Standard Offence Classification

Irregular; first issue: 1985; latest issue: 1997; 186 pp; \$37.00; ISBN: 0 642 25794 9

Previously: Australian National Classification of Offences (ANCO)

A three-level hierarchical classification developed for use in the collection and publication of crime statistics. It is used in all ABS collections requiring a classification of offences, and the ABS encourages its use by other government bodies and the community in general.

1250.0 Australian Standard Classification of Visitor Accommodation (ASCOVA)

Irregular; first and latest issue: 1995; 21 pp; \$17.00; ISBN: 0 642 20744 5

A comprehensive classification, with appropriate descriptions of types of accommodation used overnight by visitors. 1262.0 ABS Classification of Qualifications (ABSCQ)

Irregular; first and latest issue: 1993; 230 pp; \$30.60; ISBN: 0 642 18640 3

Designed to classify post-school educational qualifications, by level of attainment and field study. It was developed specifically to classify data on qualifications collected in the 1991 Census of Population and Housing and is used in other ABS collections. This publication comprises an explanation of the conceptual basis of the classification, definitions of the level of attainment categories and of the broad, narrow and detailed field of study categories, and a set of conversion tables which define the relationship between ABSCQ and other relevant classifications. Its primary purpose is to aid the interpretation of ABS statistics on qualifications. Users wishing to code their own qualifications data to the classification should refer to 1265.0, which includes the coding indexes used to code qualifications data in the Census.

Also available is the structure and definitions of the ABSCQ (1262.0.15.001) on floppy disk. This disk contains the structure of the ABSCQ and the classification definitions for level of attainment, and broad, narrow and detailed field of study categories. It does not contain the conceptual basis or appendixes that are included in 1262.0.

Links between ABSCQ and other educational classifications (1262.0.15.002) are also available on floppy disk. This disk contains the three concordances:

- ABSCQ to the International Standard Classification of Education;
- ABSCQ to the Field of Study Classification of Tertiary Education Courses; and
- ABSCQ to the 1986 Census Classification of Qualifications.

NOTE: See also 1263.0.

1263.0 Information Paper: ABS Classification of Qualifications (ABSCQ)

Irregular; first and latest issue: 1992; 4 pp; Free; ISBN: 0 642 17245 5

Provides an overview of the ABSCQ. It outlines the conceptual basis of the classification, the reason for its development and its intended use. It also contains information on the classification's relationship to other relevant classifications.

NOTE: See also 1262.0.

1265.0 ABS Classification of Qualifications (ABSCQ): Manual Coding System

Irregular; first and latest issue: 1993; 550 pp; \$30.60; ISBN: 0 642 18611 1

Designed to classify post-school educational qualifications by level of attainment and field of study. It was developed specifically to classify data on qualifications collected in the 1991 Census of Population and Housing and is used in other ABS collections. This publication was developed to enable a four-digit code (level of attainment and field of study) to be assigned to information about a particular qualification to produce statistics compatible with those produced by the ABS. It comprises a training guide, coding indexes and a guide to resolving queries. Users should refer to 1262.0 when interpreting statistics coded to this classification.

Also available is the *ABSCQ Coding Index and Valid Output Categories* (1265.0.15.001) on floppy disk. The disk contains the coding index as presented in 1265.0, together with a list of valid output codes for level of attainment and field of study. It also includes a matrix of valid level of attainment and field of study combinations. These valid output codes are not published elsewhere.

1266.0 Australian Standard Classification of Religious Groups

Irregular; first and latest issue: 1996; 121 pp; \$26.00; ISBN: 0 642 23196 6

1353.0 Integrated Regional Data Base (IRDB), Australia

Annual; first issue: 1993; latest issue: 1998; 1999 is expected to be released in 1999; CD-ROM; Price varies with requirements

Provides a wide range of social, economic and environmental data on a regional basis and time series for these dating back to 1986 or earlier for some items. Contains statistical data from social and economic collections of the ABS and from other Commonwealth agencies, covering for example, the environment, health and disability, employment and unemployment, rural economies and electoral matters. Data are available from the all-Australia level down to Statistical Local Area. The IRDB produces interactive tables, graphs, and reports from screen-based selections of areas, data items and time periods. It has powerful exporting and importing functions, and extensive metadata. The IRDB has unique functions to handle geographic boundary changes, allowing a wide range of data items to be compared on a consistent regional basis through time. The optional mapping module allows users to further examine the data through a powerful, integrated Geographic Information System. Data which have been retrieved/typed through the IRDB, including multi-date selections, can be thematically mapped or further analysed from a geographic perspective.

NOTE: Please contact the IRDB on-line help service (1800 631 150) for further information.

1357.0 Information Paper: Improvements to ABS Economic Statistics

Irregular; first and latest issue: 1997; 16 pp; \$10.00; ISBN: 0 642 25660 8

The ABS is committed to continually improving the accuracy and reliability of its statistics, especially the major economic indicators. This paper describes improvements that will be made in the near future to a range of economic statistics released by the ABS. These improvements will also involve adjustments to previously published data reflecting better coverage of several surveys and better estimation methods. They will result in more accurate and consistent series in the Australian National Accounts.

45: CRIME AND JUSTICE

4509.0 Crime and Safety, Australia

Irregular; first issue: April 1993; latest issue: April 1998 is expected to be released in 1999; 48 pp; \$19.00; ISBN: 0 642 25665 9

Summarises details on household break-ins, attempted break-ins and motor vehicle theft; personal robberies, assaults and some data on sexual assaults, in the 12 months prior to the survey. Provides information on the most recent incident including whether it was reported to the police. Also contains selected details on victimisation risk factors for break-in offences and repeat victims of assault. Data are classified by demographic characteristics. Some State and Territory data, and some comparisons with the 1993 Crime and Safety Survey, are also included.

NOTE: State level standard data sets are expected to be available for the tables included in 4509.0.

4510.0 Recorded Crime, Australia

Annual; first issue: January to December 1993; latest issue: 1998 is expected to be released in 1999; 144 pp; \$30.00; ISSN: 1329-203X

Previously: National Crime Statistics (ISSN: 1320-6532)

Contains uniform national crime statistics relating to a selected range of offences that have become known to and recorded by police. The statistics provide indicators of the level and nature of recorded crime in Australia and a basis for measuring change over time.

National crime statistics are compiled on a victim basis and measure the number of victims for each offence category rather than the breaches of criminal law. This publication provides a breakdown of the offences by victim details (age of victim, sex of victim, and relationship of offender to victim). Type of location and use of weapon data are also provided. From 1 January 1997, outcome of police investigations statistics are also included. As the national collection progressively expands, future publications will provide additional details on reported offences.

4512.0 Corrective Services, Australia

Quarterly; first issue: March 1998; 28 pp; \$17.00; ISSN: 1440-5997

Contains national information on persons in custodial corrective services in Australia. Monthly information is presented for each State and Territory. Numbers and imprisonment rates are presented by open and secure custody and periodic detention, for all prisoners and for Indigenous prisoners. Information is also presented on prisoner numbers by legal status (sentenced or unsentenced), and by sentence type ('fine default only' or 'other sentenced'). The number of sentenced receptions and the number of federal prisoners in each State and Territory are also represented. As the collection is developed, information on numbers received into custody, and number of persons serving community-based corrective service orders, will also be included.

4513.0 Higher Criminal Courts, Australia

Annual; first issue: 1995; latest issue: 1997–98 is expected to be released in 1999; 60 pp; \$21.00; ISSN: 1441-2608

Previously: Australian Criminal Courts (ISSN: 1325-541X)

Provides national case-flow data showing the number of defendants processed by the higher (Supreme and Intermediate) criminal courts. Information is presented for each State or Territory (including the aggregate total for Australia) and for each court level (including the aggregate total for higher courts combined). The publication provides monthly data and includes information about the method of initiation and finalisation of a defendant case. Data on the age and sex of defendants with finalised cases is provided.

46: ENVIRONMENT

4601.0 Australians and the Environment

Irregular; first and latest issue: 1996; 416 pp; \$44.00; ISBN: 0 642 20690 2

Previously: Australia's Environment: Issues and Facts (ISBN: 0 642 16043 0)

Presents statistical information on the relationship between human activities and the environment. The new organisational structure introduced for this edition is particularly suited to providing a sustainable development perspective on the subject. The chapters examine the influences of people on the environment, the influences of the economy on the environment, the influences of environmental processes on the economy and society. While much of the information on human activities is drawn from the databases of the ABS, the report also contains a variety of information from other agencies on characteristics of the natural environment.

4602.0 Environmental Issues: People's Views and Practices

Annual; first issue: May 1992; latest issue: March 1999 is expected to be released in 1999; 56 pp; \$20.00; ISSN: 1324-9029

Provides core environmental data on issues and concerns and data on household water conservation practices; environmentally friendly products, packaging, environmental involvement, pesticide and fertiliser use, visits to National Parks.

NOTE: The above reflects the content of the 1998 issue. Topics covered in the 1998 issue are comparable with data contained in the May 1992 and June 1994 issues. The March 1996 issue was broadly concerned with information on household waste management and transport habits, among other topics.

4603.0 Environment Protection Expenditure, Australia

Annual; first issue: 1990–91; latest issue: 1995–96 and 1996–97 is expected to be released in 1999; 64 pp; \$23.00; ISSN: 1325-0914

Presents and analyses costs incurred by governments, industry and households on environment protection measures. Using a framework based on work from OECD, UN and EUROSTAT, provides estimates of the expenditures on pollution abatement and control, as well as some other environmental expenditures in both the public and private sectors. Contains a selection of economic and general statistics on environment protection from the manufacturing, mining, agricultural, retail, wholesale and public sectors.

5246.0 Information Paper: Australian National Accounts: Introduction to Input-Output Multipliers

Irregular; first and latest issue: 1989–90; 24 pp; \$19.50; ISBN: 0 642 20763 1

Absorbs: 5237.0

Contains information about the compilation and interpretation of input-output multipliers. Output, income and employment multipliers provide, respectively, a measure of the effects of an exogenous change in final demand on: output of industries in the economy, income earned by households because of new outputs, and employment that is expected to be generated because of new outputs. Import multipliers provide a measure of the effects on usage of imports by all industries of the economy resulting from a change in final demand for the output of a given industry. Includes an order form for multiplier tables available on hardcopy and floppy disk as a special data service.

NOTE: Also available on floppy disk (5237.0.15.001) and data-report hardcopy (5237.0.40.001). For further information, please telephone Canberra on 02 6252 6723.

5248.0 Information Paper: Australian National Accounts, Introduction of Chain Volume and Price Indexes

Irregular; first and latest issue: September 1997; 30 pp; \$10.00; ISBN: 0 642 25789 2

Describes what chain volume and price indexes are, their advantages and disadvantages with respect of fixed-weighted indexes, and how and when they are to be implemented in the Australian national accounts and associated statistics. Experimental chain volume measures for the expenditure-based estimate of gross domestic product and its components are provided.

5250.0 Australian Business Expectations

Quarterly; first issue: December 1993 and September 1994; 40 pp; \$18.50; ISSN: 1320-811X

Estimates of percentage change in key business performance indicators obtained from a sample survey of business in all industries except general government and agriculture, forestry and fishing. Expected aggregate percentage change and percentage weighted net balance (percentage of businesses expecting an increase minus the percentage of businesses expecting a decrease) is provided with respect to the next quarter (compared with the current quarter), and the current quarter of following year (compared with the current quarter). The following indicators are provided: operating income; selling prices; profits; capital expenditure; stocks; employment; wage costs; non-wage labour costs; other operating expenses; and total operating expenses. The data are presented by Australian and New Zealand Standard Industrial Classification divisions and by size of business.

NOTE: More detailed information is available as a special data service on request.

5251.0 Information Paper: Implementation of Revised International Standards in the Australian National Accounts

Irregular; first and latest issue: 1997; 116 pp; \$10.00; ISBN: 0 642 25686 1

Details the proposed changes to concepts, terminology, classifications and the presentation of data in the Australian national accounts resulting from revised international standards in the System of National Accounts 1993.

5253.0 Information Paper: Upgraded Australian National Accounts

Irregular; first and latest issue: June 1998; 92 pp; \$10.00; ISBN: 0 642 27486 X

Provides details of the impact on the national accounts of the implementation of revised international standards contained in the 1993 version of the System of National Accounts (SNA93) and of the adoption of annual benchmark estimates obtained from balanced annual supply-use tables. The addendum to the publication (released in late 1998) includes the June quarter 1998 national accounts estimates compiled on the SNA93 basis and will show the new table formats which will be adopted from the September quarter 1998 issue of 5206.0 onwards. These table formats were also provided in 5253.0.

5254.0 Information Paper: Upgraded Australian National Accounts: Financial Accounts

Irregular; first and latest issue: June 1998; 84 pp; \$23.00; ISBN: 0 642 54217 1

Provides details of the impact on the quarterly financial accounts 5232.0 of the implementation of revised international standards contained in the System of National Accounts, 1993 (SNA93). Details of these changes were announced in 5251.0, which was released on 30 September 1997. The publication includes a re-issue of the June quarter 1998 financial accounts estimates adjusted for the SNA93 changes and shows the new table formats which were adopted from the September quarter 1998 issue of 5232.0.

53: BALANCE OF PAYMENTS AND INTERNATIONAL INVESTMENT

Discont'd **5301.0 Balance of Payments, Australia**

Monthly; first issue: March 1976; final issue: December 1996; 16 pp; \$14.00; ISSN: 0313-2773

Continued by: 5368.0.

Provides long-term time series for estimates of the principal balance of payments aggregates, including preliminary estimates for the latest month. Also provides key components of merchandise trade; original and seasonally adjusted estimates of services, income and unrequited transfers; trend estimates for major aggregates; and a broad sectoral dissection of the capital account. Includes data on exchange rates, analytical comment and a reconciliation of levels of official reserve assets with changes included in the balance of payments.

5302.0 Balance of Payments and International Investment Position, Australia

Quarterly; first issue: December 1961; 68 pp; \$21.00; ISSN: 1329-508X

Previously: Balance of Payments, Australia (ISSN: 0819-114X)

Merged with: 5306.0.

Provides detailed quarterly balance of payments tables on current, capital and financial transactions for the latest six quarters, including seasonally adjusted, trend and chain volume measures of the current account. It also provides a complete international investment position statement with details of the level of investment, investment flows and associated income. Detailed information is also provided on Australia's foreign debt. It includes longer term historical series, exchange rates, analytical ratios, analytical comment, graphs of principal aggregates as well as articles of interest and a list of such articles published in recent related publications.

NOTE: Long-term series are available on a variety of media. See also 5364.0 and 5365.0, which explain changes to new international standards introduced in September quarter 1997.

Discont'd **5306.0 International Investment Position, Australia**

*Quarterly; first issue: September 1976; final issue: June 1997; 36 pp; \$18.00;
ISSN: 1037-8774*

Previously: Foreign Investment, Australia (ISSN: 0819-0925)

Absorbs: 5307.0

Continued by: 5302.0

Provides a complete international investment position statement, including a detailed analysis of international investment. Covers foreign investment in Australia and Australian investment abroad, including details of the level of investment, investment flows and associated income. Detailed information is provided on Australia's foreign debt. Series are classified by institutional sector and type of investment. For foreign investment in Australia, some country and industry detail are also provided. For foreign debt, further details are included on drawings and repayments, currency, and maturity structure.

The final issue of this publication was the June 1997 issue. From the September quarter 1997 international investment position statistics have been included in 5302.0. This change, which integrated the international investment position and balance of payments data in one quarterly publication, coincided with the introduction into ABS statistics of new, integrated international statistical standards for these statistics. The consolidated publication generally includes the balance of payments information that is currently published, but is presented under the new standards. It also provides a complete international investment position statement, including an analysis of international investment covering details of the level of investment, investment flows and associated income. Detailed information is also provided on Australia's foreign debt.

NOTE: Data previously contained in this publication are available on request. For further information, please telephone Canberra on 02 6252 5601. See also 5364.0 and 5365.0, which contain balance of payments and international investment position statistics up to June quarter 1997, recompiled under the new standards.

Discont'd **5320.0 Merchandise Imports, Australia: Balance of Payments Basis**

*Monthly; first issue: September 1994; final issue: January 1997; 8 pp; \$13.50;
ISSN: 1321-8271*

Continued by: 5368.0 and 5439.0.

Provides the earliest release of preliminary aggregate measures of merchandise imports on a balance of payments basis (including seasonally adjusted and trend estimates). It contains a single table incorporating statistics on merchandise imports under 3 'end-use' categories (consumption goods, capital goods, and intermediate and other goods), for 15 months and 3 years. These 3 categories are further divided into a total of 26 broad commodity groupings. Some analytical comment and graphs are included.

**5331.0 Balance of Payments and International Investment Position,
Australia: Concepts, Sources and Methods**

Irregular; first issue: 1981; latest issue: 1998; 220 pp; \$40.00; ISBN: 0 642 25670 5

Provides a comprehensive description of the concepts and structure of the Australian balance of payments and international investment position statistics compiled under new international statistical standards and of the data sources and methods used to compile these statistics. Explains what the statistics measure, how they relate to other economic series, how they are produced, where they are published and describes the factors influencing their accuracy and reliability. Provides background information that will assist users in analysing and interpreting the statistics and identifies emerging issues in this field of statistics.

**5342.0 Information Paper: Quality of Australian Balance of Payments
Statistics**

Irregular; first and latest issue: 1996; 100 pp; \$10.00; ISBN: 0 642 17302 8

Addresses the quality of balance of payment statistics published by the ABS. It first discusses the issues associated with, and factors that influence, the quality of these statistics. It goes on to consider the accuracy and reliability of the statistics and gives an assessment of the accuracy of the broad aggregates that make up the accounts as well providing some statistical measures of their reliability. The paper also outlines the steps that the ABS takes to maintain the quality of the statistics and mentions several developments that are expected to lead to improvements in quality in the next few years. The paper also updates the analysis of revisions to monthly balance of payments statistics included in 5331.0 and extends the analysis to cover quarterly and annual series.

Discont'd **5351.0 Balance of Payments, Australia — Summary of Concepts, Sources and Methods**

Irregular; first issue: 1988; final issue: 1996; 54 pp; \$17.50; ISBN: 0 642 18664 2

It includes a brief description of the new statistical framework, a comparison with existing frameworks, and details of the changes to be made in the next releases of balance of payments and international investment statistics. Also includes tables showing data compiled on the new basis for the periods and series covered by the June quarter 1997 issues of 5302.0 and 5306.0, and by the September month 1997 issue of 5368.0. Historical series for the main aggregates will also be provided.

Discont'd **5366.0 Information Paper: Do We Need Monthly Balance of Payments Statistics?**

Irregular; first and final issue: 1997; 25 pp; \$10.00; ISBN: 0 642 23292 X

The quality of ABS balance of payments statistics has been under review and improvement for many years. Subjective assessments of the lower than desirable quality of the monthly balance on current account series, coupled with recently promulgated international reporting obligations requiring quarterly, rather than monthly, balance of payments data has prompted the ABS to review with users the options for monthly balance of payments statistics. This information paper provides background to the issues of balance of payments data quality and quality improvement, the emerging concerns about the monthly data, and the options under consideration for addressing those concerns.

User views are sought on the proposal to discontinue the monthly balance of payment statistics and, if so, the merits of the various options proposed in this information paper for replacement series.

6310.0 Employee Earnings, Benefits and Trade Union Membership, Australia

Annual; first issue: August 1975; latest issue: August 1999 is expected to be released in 1999; 60 pp; \$21.00; ISSN: 1301-0819

Previously: Weekly Earnings of Employees (Distribution), Australia (ISSN: 1030-9314)

Absorbs: 6325.0 and 6334.0

Contains information from three survey topics: weekly earnings of employees, core employment benefits and trade union members. Weekly earnings data shows the distribution of weekly earnings of all wage and salary earners classified by full-time/part-time status, permanent or casual employee, sector, hours worked and hours paid. Core employment benefits data includes information relating to sick leave, annual leave, long-service leave and superannuation coverage. Information about the level of trade union membership is also provided. For each of these topics estimates can be cross-classified by demographics such as State, sex, age, marital status, birthplace; and by labour force characteristics such as industry of main job and occupation of main job.

NOTE: From the August 1998 issue, the publication title has been changed to reflect the permanent inclusion of data relating to employment benefits and trade union membership.

The August 1997 issue also contains information about core employment benefits, and trade union membership. Data for August 1994 and August 1995 are available as a standard data service (6310.0.40.001).

Regarding the three survey topics covered by this publication, weekly earnings data have been collected annually since 1975, except in 1996. Core employment benefits data have been collected annually since 1983. From 1983 to 1992 the survey collected a broader range of non-wage employment benefits. These are now collected on an irregular basis, with the next full survey in August 1999. Information about the level of trade union membership in Australian was first collected in 1982, then two-yearly from 1986 to 1990, and annually from 1992.

6421.0 Information Paper: An Analytical Framework for Price Indexes in Australia

Irregular; first and final issue: 1997; 56 pp; \$10.00; ISBN: 0 642 23295 4

Prepared as a basis for user consultation on a strategy for enhancing the ABS statistical service in the field of price indexes. In recent years, there has been increasing international attention directed towards developing new approaches to the measurement of inflation. Accordingly, this paper presents a statistical framework which will enable the range of separate price index series to be drawn together and presented as a system of indexes designed to support the analysis of inflation.

New issue

6422.0 Information Paper: Producer Price Index Developments

Irregular; first and latest issue: 1997–98 is expected to be released in 1999; 50 pp; \$10.00; ISBN: 0 642 54215 5

Introduces experimental producer, and international trade, price indexes within a Stage of Production framework. The framework represents an important element of the strategy for the systematic analysis of inflation.

The paper also contains experimental producer price indexes for the output of a selection of transport and storage, and property and business services industries.

6451.0 Information Paper: Issues to be Considered During the 13th Series Australian Consumer Price Index Review

Irregular; first and latest issue: April 1997; 72 pp; \$10.00; ISBN: 0 642 25779 5

The Consumer Price Index (CPI) is subject to periodic review. The information paper discusses major issues to be considered in the current review and presents ABS preliminary views on these matters as a basis for public consultation. Issues to be addressed include: the principal purpose of the CPI; the population and regional coverage; frequency of publication, and the commodity classification and item coverage. Submissions to the review were to reach the ABS by 7 June 1997. Results of the review were implemented in the September quarter 1998 release of the CPI.

NOTE: The CPI is published in 6401.0. Results of the 12th Series Review were published in 6450.0. Results of the 13th Series Review were published in September 1998.

This information paper is also available on the ABS Website on the Internet (www.abs.gov.au). See also 6454.0.

6453.0 Information Paper: Outcome Of The 13th Series Australian Consumer Price Index Review

Irregular; first and latest issue: October 1997; 20 pp; \$10.00; ISBN: 0 642 25721 3

The ABS has consulted widely during the course of the Consumer Price Index (CPI) review, invited public submissions and conducted seminars in each capital city. An Advisory Group, representing major users of the CPI, assisted in coordinating views on the CPI.

Outlines decisions reached by the ABS in undertaking the latest in a series of periodic reviews of the CPI. Major issues for the review included the principal purpose of the CPI, frequency of compilation, population coverage and commodity classification and item coverage which were discussed in 6451.0.

NOTE: One copy of the information paper provided free to all existing CPI subscribers, PC AUSSTATS users and those who made submissions to the review. See also 6401.0.

This information paper, along with a selection of the general submissions to the 13th Series Australian CPI Review made by members of the CPI Review Advisory, are available on the ABS Website on the Internet (www.abs.gov.au).

8132.0.45.001 Business Register Consultancy — Management Units

Price on application

The Management Unit is the largest unit within a business for which detailed accounts are kept on at least a quarterly basis. For most businesses, particularly the smaller ones, it will equate with the legal entity owning the business (i.e. the sole proprietor, partnership, incorporated company, etc.). For larger businesses, there may be a Management Unit for each 'line of business' or 'division' that the business operates. Structurally, Management Units consist of one or more Locations, so their industry code will reflect the predominant activity of their Locations, and their employment will be the sum of the employment of their Locations.

This consultancy service provides a count of businesses (as recorded on the ABS Business Register Extract) at the Management Unit level. Information can be output in the form of tables, maps, reports or files, tailored to a client's specific needs. Business counts can be requested, cross-classified by:

- employment size ranges — both standard and customised;
- aggregate employment (confidentialised);
- industry (Australian Standard Industry Classification for Extracts prior to March 1994, or Australian and New Zealand Standard Industrial Classification for later Extracts);
- geographic area (Australian Standard Geographical Classification) including Local Government Areas and Australia Post postcodes;
- type of legal organisation; and
- public/private sector.

8132.0.45.002 Business Register Consultancy — Locations*Price on application*

The Location is the physical site from which a business engages in productive activity on a relatively permanent basis (e.g. a shop, a factory, or a suite of offices in a multi-occupancy building). For an agricultural unit, the Location is usually the property, even though this may consist of a number of separate holdings. The Location is the lowest-level business unit recorded on the Register.

This consultancy service provides a count of businesses (as recorded on the ABS Business Register Extract) at the Location level. Information can be output in the form of tables, maps, reports or files, tailored to a client's specific needs. Business counts can be requested, cross-classified by:

- employment size ranges — both standard and customised;
- aggregate employment (confidentialised);
- industry (Australian Standard Industry Classification for Extracts prior to March 1994, or Australian and New Zealand Standard Industrial Classification for later Extracts);
- geographic area (Australian Standard Geographical Classification) including Local Government Areas and Australia Post postcodes;
- type of legal organisation; and
- public/private sector.

8635.0 Tourist Accommodation, Australia

Quarterly; first issue: September 1975; 40 pp; \$18.50; ISSN: 1031-0770

Hotel, motel and serviced apartment establishments with 15 or more rooms or units providing short-term accommodation; showing number of establishments, capacity and employment for the quarter and occupancy and takings from accommodation for each month; by type of establishment and by star grading, for each State/Territory and Australia. Also includes data for Tourism Regions as defined by the respective State/Territory tourism commissions.

NOTE: Output from March quarter 1998 involves substantial 'break in series' changes from previous quarterly Survey of Tourist Accommodation (STA) output. However, some retabulated 'bridging' data for 1997 are incorporated variously into the published tabulations. Note that 1997 data presented in this publication will thus differ from previously published data.

'Break in series' STA changes which have occurred are: The survey no longer collects data on caravan parks, holiday flats, units and houses or visitor hostels on an ongoing basis. The size cut-off for hotels, motels and guest houses has been increased and the survey now excludes establishments with fewer than 15 rooms, whereas the previous size cut-off was five rooms. Serviced apartments are included in the collection as a separate category for the first time, with a minimum size cut-off of 15 or more units. Some establishments formerly included as hotels, motels or holiday flats and units are now classified as serviced apartments; while a small number of establishments previously classified as motels have been reclassified as holiday flats and units and are therefore no longer in the regular scope of the STA. Employment information on males and females is no longer separately collected, but casual employee numbers are now collected separately from full-time and part-time employee numbers; and monthly employment data are being collected on a trial basis for four quarters.

See also 8635.1.40.001 to 8635.7.40.001. These data reports, incorporating most of the previously published information, include information where releasable for component Local Government Areas and Statistical Local Areas of Tourism Regions. Unpublished information on employment may be available on request.

The State and Territory Tourist Accommodation publications, from 8635.1 to 8635.8, have been discontinued.
